

Invitation til

# Management of Portfolios - MoP

- en ny Best Practice fra OGC

## En unik mulighed for at møde Stephen Jenner – forfatter og chief examiner for MoP™

### HVORFOR PORTEFØLJESTYRING?

Porteføljestyring er et "hot topic" over hele verden. I virksomheder i mange forskellige størrelser og brancher arbejdes der med spørgsmål som: "Hvordan sikrer vi, at vi starter de rigtige projekter?", "Bruger vi vores knappe ressourcer optimalt?", "hvordan prioriterer vi bedst?" etc. De potentielle gevinster er store, men hvordan får man succes?

### MANAGEMENT OF PORTFOLIOS

Management of Portfolios (MoP) is a new set of guidance from OGC.

The core guidance is aimed at the decision makers who have to prioritise investment across an organization's programmes and projects. The guide introduces the key concepts of portfolio management, its benefits to an organisation, how it fits in with current business processes and how to get started.

### THE SPEAKER

Stephen Jenner is co-author and chief examiner for the latest best practice from Office of Government Commerce: Management of Portfolios – MoP.

Previously Steve headed the Criminal Justice System IT Portfolio (a £2 billion investment in modernizing justice) Unit from its establishment in 2005 to 2008. Since then he has worked on the development of Project Portfolio Management and Benefits Management for the Cabinet Office as part of the Transformational Government agenda, and lead on benefits management research for the OGC PPM Standards Group. He also provides independent benefits management advice on major cross-government programs.

Steve designed, implemented and operated the CJS IT approach to Portfolio & Benefits Management that has been recognized internationally and which **won the 2007 Civil Service Financial Management Award**. Infamously described by John Suffolk, the UK Government CIO as, "*the rottweiler of benefits management.*"

Sølvgade 10, 5  
DK - 1307 København K
